Ashok Kumar Vundavalli

DevOps & SRE Leader | Driving Cloud Reliability & Engineering
Transformation with AI | CI/CD · IaC · Observability | SAFe® 6 SSM |
Agile
Greater Hyderabad Area

Summary

With 19 years in IT, I've built my career at the intersection of engineering excellence and operational reliability — leading DevOps and SRE transformations that make systems faster, more resilient, and ready to scale.

I've spent the last several years working at a senior level across cloud-native and hybrid environments, partnering with engineering, product, and business leaders to turn infrastructure from a bottleneck into a competitive advantage.

What I do best:

I design and deliver CI/CD pipelines that enable zero-downtime deployments, build observability frameworks that surface problems before users feel them, and architect cloud infrastructure on AWS and Azure that is secure, cost-efficient, and built to scale to millions of users.

I lead with SRE principles — SLIs, SLOs, chaos engineering, and blameless incident culture — and I bring the same rigour to team development as I do to system design. I've mentored engineers, built high-performing cross-functional teams, and championed DevOps culture across organisations where it didn't yet exist.

Tech I work with regularly: Terraform · Ansible · Kubernetes · Docker · Helm · Jenkins · GitOps · Azure · AWS

What I'm looking for:

I'm currently open to senior DevOps and SRE leadership opportunities where I can drive meaningful engineering transformation — whether that's scaling infrastructure, modernising legacy systems, or building reliability culture from the ground up. Open to connecting with recruiters, engineering leaders, and teams doing interesting work in cloud reliability and DevOps.

Experience

Aderant

Team Lead

May 2022 - April 2025 (3 years)

Hyderabad, Telangana, India

Deloitte

Assistant Manager

November 2013 - December 2021 (8 years 2 months)

Greater Hyderabad Area

DevOps engineer, Reliability Engineer, SharePoint admin. .net developer.

Accenture

6 years 5 months

Lead System Analyst

July 2008 - October 2014 (6 years 4 months)

Managed SharePoint projects, delivering custom applications within timelines. Led a 5-member team to develop and deploy SharePoint solutions. Configured SharePoint components such as workflows, InfoPath forms, and master pages. Conducted employee training and participated in talent recruitment panels.

Team Lead

August 2010 - November 2013 (3 years 4 months)

Hyderabad

Systems Analyst, Team Lead

Senior Programmer

June 2008 - August 2010 (2 years 3 months)

- Developed a comprehensive Product Brand Portal using MOSS 2007 and SharePoint, enhancing user engagement.
- Customized workflows and created InfoPath forms to streamline processes, improving efficiency by 30%.
- Collaborated with cross-functional teams to deliver tailored solutions, ensuring alignment with client requirements.

Iridium Interactive Limited

Lead System Analyst

April 2006 - June 2008 (2 years 3 months)

Developed SharePoint solutions, delivering custom applications within timelines. Part of team that developed a CMS Portal for a client. Configured SharePoint components such as workflows, InfoPath forms, and master pages.

Iridium Interactive

SE

March 2006 - May 2008 (2 years 3 months)

Software Engineer

Education

Griffith College

Graduate Diploma, Computing · (2001 - 2003)

University of Madras

Bachelor of Engineering, Mechanical Engineering · (August 1996 - October 2000)
